

SEPIA TONE EFFECT – PHOTOSHOP TUTORIAL

By Kim Hill

If you have any questions regarding this tutorial, please contact me at kim@cgsentials.com

Choose the photo you want to colorize as sepia. Adjust the image size to your liking and save it as a new document. Set your foreground color to black and your background color to white. Now, click on Image/Adjustments/Hue-Saturation.

A window will pop open. Adjust the settings as follows: Hue 25, Saturation 19, Lightness +8. Voila! You may want to adjust your settings a little differently depending on how brown or yellow you'd prefer the end result to be.
